

CASING / PIPE PULLER

Service > Hydraulic Workover > Equipment

The Casing/Pipe Puller has been designed to perform low cost Workover and Plug & Abandonment operations. This very compact unit can be easily installed on small offshore platforms and onshore locations requiring minimum footprint and crane capacity.

The unit has the same operational speed and performance as conventional hydraulic workover units.

Advantages & Characteristics:

- Cost efficient
- Suitable for small platforms with limited crane capacity
- Quick and simple rig-up
- Small footprint
- Simple to operate
- Handling casing sizes up to 17-3/4 Inch
- Low cost workover, re-completion and P&A operations

Operational activities:

- Rigless workover
- Rigless Plug & Abandonment
- Retrieving casing
- Casing window milling
- Downhole casing cutting
- Offshore and onshore use
- Low cost operations
- Low cost re-completions

Technical Data

Unit weight	56,000 lbs	25 mT
Pull capacity	385,000 lbs	173 mT
Rotary torque	20,000 ft. lbs	27.000 Nm
Stroke	10 ft	3 m
Through bore	17 - 3/4"	450 mm
Slip bowls	Different types (pipe and casing slips)	
CB wick package	2 x 3000 lbs (No Gin Pole) 2 x 1500 kg (No Gin Pole)	

Rigless workover – Save costs

Exploit the benefits of our Rigless workover techniques and our proven workover track record

THE LEADING PROVIDER OF HYDRAULIC WORKOVER, SNUBBING, WIRELINE AND WELL CONTROL SERVICES

TOGETHER WE ARE STRONG!

Our enduring strength is in our commitment to achieving the highest possible industry standards for Quality, Health, Safety and Environmental protection. By continuously developing best-in-class practices we provide clients with the best quality services.

Our equipment conforms to all regulatory requirements of the geographical areas we work in today and we have plans for tomorrow.

WE DO NOT COMPROMISE!

The right way, the safe way, 24 hours a day around the globe.

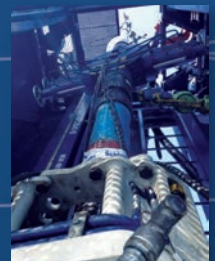

ISO 9001 / 14001
OHSAS 18001
SCC Petroleum

WE PERFORM BEST UNDER PRESSURE!

From live well Snubbing to dead well Hydraulic Workover, we are able to deliver and manage the entire package, from wireline to well control and engineering – no job too rough or too tough! We are proud of our distinguished operational performance and long track record of success with major companies providing:

- Well redevelopment projects
- Milling/Fishing/Well clean outs
- Sand screen deployment
- WL/TC Perforation
- Production-/Well Integrity Logging
- Pipe/Casing cutting
- Wellhead change-outs
- Plug & abandonment / Re-abandonment
- UB/OB (casing) drilling
- Underbalance-(UB) well deepening/Liner installation
- Velocity string installation
- ESP/Safety valve installation and change-outs
- Well clean outs and other services
- Custom designed project
